surface science

MASTER INDEX

A journal devoted to the physics and chemistry of interfaces

Editor:
Charles B. Duke, Webster, NY

Regional Editors:
George Comsa, Germany; Shinji Kawaji, Japan; Richard M. Lambert, UK

Master Index to Volumes 261–270

SUSCA MI 261–270, 1–202 (1992)

North-Holland

FOUNDING EDITOR: Harry C. Gatos

EDITORIAL ADDRESSES:

Editor:
Dr. Charles B. Duke, Xerox Webster Research Center, 800 Phillips Road, Bldg. 0114-38D, Webster, NY 14580, USA
Telefax: +1-716-265-5080

Regional Editors:
Professor George Comsa, Institut für Grenzflächenforschung und Vakuumphysik der KFA Jülich, Postfach 1913, D-5170 Jülich 1, Germany
Telefax: +49-2461-58627

Professor Shinji Kawaji, Department of Physics, Gakushuin University, 1-5-1 Mejiro, Toshima-Ku, Tokyo 171, Japan
Telefax: +81-3-5391-1513

Dr. Richard M. Lambert, Department of Chemistry, University of Cambridge, Lensfield Road, Cambridge CB2 1EP, UK
Telefax: +44-223-336362; Electronic mail: RML1@UK.AC.CAM.PHX

All correspondence with the publisher regarding manuscripts accepted for publication should be addressed to:
Surface Science Technical Editors, P.O. Box 103, 1000 AC Amsterdam, The Netherlands
Telephone: +31-20-5862 526; Telefax: +31-20-5862 775.

Please do not use telefax or electronic mail for the transmission of manuscripts.

Detailed information on submission and preparation of manuscripts may be found in the Requirements for swift publication on page 3 of the cover.

Surface Science is published in semi-monthly issues. For 1992, 18 volumes have been announced. The subscription price for these volumes is Dfl. 7560.00 (US$ 4128). Postage and handling amount to Dfl. 558.00 (US$ 305). Therefore the total price is Dfl. 8118.00 (US$ 4433). The price for a combined subscription to the 1992 volumes of Surface Science, Applied Surface Science and Surface Science Reports is Dfl. 10287.00 (US$ 5617), including postage and handling. The Dutch guilder prices are definitive; the currency equivalents are for your guidance only.
Subscriptions should be sent to the publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, or to any subscription agent or bookseller. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.
Books for review should be sent to Dr. C.B. Duke

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the written permission of the publisher, Elsevier Science Publishers B.V., Copyright & Permissions Department, P.O. Box 521, 1000 AM Amsterdam, Netherlands.
Special regulations for authors – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.
Submission to this journal of an article entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the USA – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. (N.B. For review journals this fee is US$ 0.20 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

US mailing notice – Surface Science (ISSN 0039-6028) is published semimonthly by Elsevier Science Publishers, Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Annual subscription price in the USA is US$ 4433 (subject to change), including air speed delivery. Application to mail at second class postage rate is pending at Jamaica NY 11431.
USA POSTMASTERS: Send address changes to Surface Science, Publications Expediting, Inc., 200 Meacham Avenue, Elmont NY 11003. Airfreight and mailing in the USA by Publications Expediting.

MATERIALS & PROCESSING Report

AN INTERNATIONAL TECHNICAL BULLETIN

"**Materials and Processing Report** provides a breadth of coverage with in-depth technical information which is unmatched in the field."
– Dr. Carl Zweben, Advanced Technology Manager and Division Fellow, General Electric Astrospace Division

"Unquestionably the most technically accurate newsletter on the market . . . [the editor] has a real knack for differentiating between developments which are ordinary and those which will have a significant commercial impact."
– Dr. Andrew C. Nyce, President, Gorham Advanced Materials Institute

Edited by Renée G. Ford, Ph.D.
Published in association with the Materials Processing Center at the Massachusetts Institute of Technology

Materials and Processing Report (M&PR) is a monthly technical report that focuses on the state of the art in advanced performance materials as they affect the drive for competitive advantage and leadership in technology. **M&PR** brings you technical summaries of the most significant developments in all areas of advanced materials and all types of processing innovations. In addition to feature articles, **M&PR** includes materials industry analyses, policy news, patent reports, reviews of outstanding publications, international meeting calendars, and highlights of key technical conferences worldwide.

- AT NO COSTS
- PERSONAL DELIVERY
- VIA ELECTRONIC MAIL

is the answer!

Stay on top of developments in the area of **Surfaces, Interfaces and Thin Films.** Subscribe now!

CONTENTS-Alert is an efficient, pre-publication current awareness service that saves valuable time.

CONTENTS-Alert transmits the table-of-contents of the following set of journals every bi-weekly directly to your personal electronic mailbox. Journals included in this service are:

● Applied Surface Science ● Surface Science ● Surface Science Letters ● Surface Science Reports ● Materials Science Reports ● Nuclear Instruments and Methods, Section B ● Thin Solid Films ● Chemical Physics Letters (appropriate sections only)

REQUIREMENTS FOR SWIFT PUBLICATION

Submission: *Contributions* must be written in English. **They should be submitted in triplicate with original drawings of the figures** (no larger than ca. 20×30 cm) and an abstract in English. All manuscripts, other than Letters, originating in Germany and Austria, should be submitted to the Regional Editor in Germany. All manuscripts, other than Letters, originating in European Countries, other than those mentioned above, as well as those originating in Africa, should be submitted to the Regional Editor in the UK. All manuscripts, other than Letters, originating in Japan, should be submitted to the Regional Editor in Japan. All manuscripts originating in North and South America, in Asia (except Japan), in Australia or New Zealand, should be submitted to the Editor.
All Surface Science Letters regardless of country of origin, should be submitted directly to the Editor.

Refereeing: *The authors are encouraged to list the names (addresses and telephone numbers) of three to four individuals who are qualified to serve as referees for their paper.* The proposed referees should preferably reside in the same country or continent as the Editor or Regional Editor to whom the paper is submitted. The referees selected will not necessarily be from the list suggested by the author. Failure to provide complete data on several suggested referees may delay processing of the manuscript.

Copyright transfer: The submission of a paper will be taken to imply that the author has satisfied himself that no copyright will thereby be infringed. Upon acceptance of an article by this journal the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Publication speed: To qualify for rapid publication in **Surface Science Letters** manuscripts should not exceed 2000 words in length, excluding abstract, list of references and a maximum of 5 tables or figures which will be counted as separate.

Preparation of manuscripts: The following are the stylistic requirements for a manuscript.

(1) *Manuscripts* should be typed throughout with double line spacing and wide margins on numbered pages.

(2) *Title page(s)* should contain, in addition to the article title, author(s)' names and affiliations, the text of related footnotes and the text of the abstract. Indicate which author will act as contact author and provide FAX No., telephone No. and telex No., if available. Failure to be able to contact the author by FAX can result in significant delays in processing the manuscript.

(3) *Tables* should be typed on separate sheets at the end of the manuscript. In addition to its serial number, each table should have a sufficiently detailed heading or caption to explain the data displayed in it.

(4) *Figures* should be numbered and their captions listed together at the end of the manuscript. Each figure should have a sufficiently detailed caption explaining the data displayed. A set of good quality drawings and photographs is required to produce the printed line figures and half-tone plates in the journal. Photographic copies ("glossy prints") of drawings are also acceptable for the line figures if they have been sharply focused and evenly exposed. **As a rule, Xerox copies cannot be accepted**. Original drawings and photographs will be returned after publication of the paper.

(4a) *Line figures*: The drawings or glossy prints supplied for the line figures should be 1.5–3 times larger than the printed size of the figures and should contain all the required, carefully applied lettering.
Figures are preferably reduced to a single column width (7.6 cm) unless their complexity, large width-to-height ratio, or need to display special detail makes a larger format necessary (max. printed width ~ 20 cm). Inappropriately sized lettering on a figure may prevent its reduction to the size optimum for its information content. The lettering used on a drawing should be chosen so that after reduction, the height of numbers and (capital) letters falls within the range 1.2–2.4 mm. Care should be exercised in choosing the pen width of machine-plotted graphs. Frequently lines in these figures are too fine compared to the area of the figure.
Shaded areas in line figures should be shown by means of cross-hatching (or a matrix of dots) rather than a continuous grey "wash". Cross-hatching, after reduction, of density less than ~ 25 lines/cm is satisfactory.

(4b) *Half-tone plates*: Photographs supplied for reproduction should be unmounted unless they form part of a composite figure and they should have a somewhat greater contrast than is desired in the printed figure. It is important that the photographs supplied are not screened (overprinted with the point-matrix used by printers) or moiré patterns will form when they are screened for a second time. When necessary, the top side of a photograph should be marked on the back. A reduction factor should be recommended for a photo when it is not obvious what detail in the photo is of interest.

(4c) *Colour plates*: Illustrations can be printed in colour when they are judged by the Editor to be essential to the presentation. The Publisher and the author will each bear part of the extra costs involved. Further information concerning colour illustrations and the costs to the author can be obtained from the Publisher.

(5) *References* in the text to other publications should be numbered consecutively within square brackets, for example: "... and Chang and Weaver [1] show ..." and listed together at the end of the text, for example:
[1] S.-C. Chang and M.J. Weaver, Surf. Sci. 241 (1991) 11.
[2] S.J. Hoekje and G.B. Hoflund, Appl. Surf. Sci. 47 (1991) 43.
[3] F.J. Himpsel, Surf. Sci. Rep. 12 (1990) 1.
[4] A. Roth, Vacuum Technology, 3rd ed. (North-Holland, Amsterdam, 1990).
[5] V. Celli, in: Dynamical Properties of Solids, Vol. 6, Eds. G.K. Horton and A.A. Maradudin (North-Holland, Amsterdam, 1990) p. 337.

References to unpublished or not readily accessible reports should be avoided. In the case of multiple authorship all authors should be listed in the references provided they number less than ten. Only in the case of more than ten authors is the first author et al. acceptable.

(6) *Formulae* in the manuscript should be typed with particular consideration given to characters that may be misinterpreted, e.g.

I (cap.), l (el), 1 (one), ′ (prime)	c, C; k, K, κ (kappa); p, P, ρ (rho)
o (lower case), O (cap.), 0 (zero), ° (deg)	u, v (lower case), ν (nu), V (cap.)
$\times$ (times), x (lower case), X (cap.)	Σ (sigma), $\sum$ (sum), Π (pi), $\prod$ (product); etc.

If necessary, unusual symbols should be explained in pencil in the margin.

(7) *Vectors* should be indicated by a wavy underlining, and will be printed in bold-face italics.

Delay in publication might occur if the above requirements are not met.

Submission of electronic text: The final text may be submitted on a 3.5″ or 5.25″ diskette (*in addition to a hard copy with original figures*). Both double density and high density diskettes are acceptable, but they should be formatted according to their capacity before the files are copied onto them. The main text, list of reference, tables and figure legends should be stored in separate text files with clearly identifiable file names. The format of these files depends on the wordprocessor used. It is essential that the name and version of the wordprocessing program, type of computer on which the text was prepared, and format of the text files are clearly indicated. The final manuscript may contain parts (e.g., formulae, complex tables) or last minute corrections which are not included in the electronic text. This should be clearly marked in the additional hard copy.

Page charge and reprints: There is **no** page charge. Reprints may be ordered from the publisher. An order form will be sent to contributors together with the proofs. 25 reprints of the article will be supplied free of charge.
